Welcome to Savannah!

It was six years ago that AMIA first came to Savannah. A city rich in history and hospitality seemed a fitting place to return to host our 2014 Annual Conference. The charming shop-filled streets and greenways of Savannah will seem little changed to those who attended in 2008, but the field of moving image archiving and preservation has indeed undergone transformations. The annual conference is a time for our community of professionals to come together to discuss the latest trends in the field, to take stock of where we have been and where we are going, and to welcome new members to the fold.

We come together on the heels of yet another successful Reel Thing in Los Angeles, CA, which garnered a feature length article in the Hollywood Reporter titled “As Kodak Negotiates Film’s Future With Studios, Archivists Seek Digital Options,” that also included the subtitle “There’s no clear answer to the digital archiving dilemma.” While this may be true, it is also the case that this may not be the doomsday prophecy that journalists would like it to be. Film and media archivists are constantly coming up with ‘new’ ways to solve ‘old’ problems; if not X, then Y has been our motto for some time. At once forward thinking, resourceful, and creative, we are ever mindful of historical and legacy media, and cautiously optimistic about new avenues for access and preservation.

With this in mind, the AMIA Board focused this year’s conference around a series of curated streams as well as open calls for proposals. The Board seemed to be right on target, as echoes of these three themes: Open Source Digital Preservation and Access, Film in Transition, and Global Exchange resonated in the general pool of submissions as well. This also reinforced our belief in the community of knowledge sharing that AMIA has helped to create in order to sustain and support best practices in audiovisual archiving.

For our opening Keynote, we are fortunate to have Ian MacKay on Thursday morning. Currently the front man of The Evens, founder of his own music label, and the mastermind behind the Fugazi Live Series online archive, he will offer a unique perspective on and appreciation of archival practice and managing collections.

Access remains a key focus of the program this year, but there is also a visible turn to mediating access in an ever more media saturated landscape. With this in mind, we are very pleased to welcome representatives of NEH who will address grant funding during Friday morning’s plenary and then solicit feedback and ideas from the membership on the needs of the profession at a town hall session later in the day.

(continued)
Duplicate records, unidentified versions, mislabeled assets, bad metadata. **Just because your content is neat and organized doesn’t mean it’s curated.**

For over 28 years LAC Group has been providing the talent, tools and techniques to curate content and maximize value for our clients.

Let us show you how we can streamline YOUR media collection and improve access to the content that REALLY matters.

To learn more about our Information Curation services, or to schedule a content triage review, please visit www.lac-group.com/amia-14.
Welcome to Savannah

“We have a saying: If you go to Atlanta, the first question people ask you is, ‘What’s your business?’ In Macon they ask, ‘Where do you go to church?’ In Augusta they ask your grandmother’s maiden name. But in Savannah the first question people ask you is ‘What would you like to drink?’”

- from Midnight in the Garden of Good and Evil

In our second year of collaboration with the Digital Library Federation, Hack Day offers an intense day for archivists, collection managers, technologists, and others working together to develop software solutions for audiovisual access and preservation. This year there is an added component - a concurrent Wikipedia edit-a-thon, focused on topics related to digital preservation & access for audiovisual materials. Results will be discussed during Saturday’s morning plenary.

Thanks to the growing presence of AMIA in social media, and the seeds that we planted in Savannah six years ago, we are also pleased to be strengthening ties with the local media and arts communities and partnering with the local archives communities in our host city. The program features a special screening of archival Girl Scout themed films (Savannah is the birthplace of Girl Scouts founder Juliette Gordon Low), a screening of independent films from Savannah filmmakers with live musical accompaniment, the Community Archiving Workshop that pairs veteran AMIA members with local archives in need of assistance with assessment and inventorying of their collections, and last but not least a special screening of a restored Disney classic at the Lucas Theater for the Savannah community - including the Greenbriar Childrens Home, local schools and Hunter Army Airfield.

Two more screenings will close the week on Saturday evening. They highlight the collaborative and global culture of media making and archiving. The first is a documentary about Ellis R. Dungan who brought many technical innovations to the developing Tamil Film Industry of the 1930s and ‘40s. The second film, from China, was thought lost until 2011 when a copy was found in the vaults of the Norwegian National Library. Pan Si Dong is considered one of the most important films in the history of Chinese cinema.

In short, there is something for everyone, and we are so glad that you are here with us.

Carol Radovich and Regina Longo
Conference Committee CoChairs
To Our Sponsors: Thank you!

Without the generous support of our sponsors, many of AMIA’s events, programs and activities wouldn’t be possible.

On behalf of all of us at AMIA - thank you!

How do you define quality?

In archival scanning, it's a combination of care, experience, and superior technology.

That's why, at Reflex Technologies, we have more than 100 years of film and digital experience on staff. And that's why we designed our unique Reflex scanners with input from cinematographers, archivists, colorists, and other filmmakers.

No other 8mm, 16mm or 35mm scanners are more versatile. Or are kinder to film.

We take extraordinary care with every part of the process. The uncompressed AVI and DPX files we provide on hard drives are as faithful to film as possible.

And we produce viewing copies - in virtually every file format available - on the superior JVC media, which meet rigorous ISO standards for longevity and for minimized risk of technological obsolescence.

We can handle all aspects of the digital transfer process to make your films of yesterday useful and accessible for tomorrow.

And we do it with quality.

For more information, visit www.reflextechnologies.com or call 818-859-7770

AMIA Committees

Everyone at the conference is welcome (and encouraged!) to attend any of the meetings listed throughout the week in the Program. If you’re interested in joining a committee, attend a meeting, contact the chair or the AMIA office. Join now and help to lead AMIA forward!

COMMITTEES OF THE BOARD
AMIA Board Committees are focused on the business and service functions of the Association, and are created and appointed by the Board of Directors
- Awards and Scholarships: Pam Wintle, Chair
- Conference: Carol Radovich and Regina Longo, Chairs
- Development: Ralph Sargent, Chair
- Elections and Nominations: Andrea McCarty, Chair
- Publications: Melissa Dollman and Devin Orgeron, Chairs

COMMITTEES OF THE MEMBERSHIP
AMIA Committees of the Membership are focused on the principal activities of the profession and are established and managed by the membership
- Advocacy: Ray Edmondson and Caroline Yeager, Chairs
- Access: Ariel Schudson, Chair
- Cataloging and Metadata: Thelma Ross, Chair
- Copyright: John Tariot, Chair
- Diversity: Moriah Ulinskas, Chair
- Education: Kelle Anzalone and Carla Arton, Chairs
- Independent Media: Rufus de Rham and Lauren Sorensen, Chairs
- International Outreach: Benedict Olgado and Kara Van Malssen, Chairs
- Lesbian, Gay, Bisexual and Transgender: Janice Allen and Robert Lemos, Chairs
- Magnetic Tape Crisis: Peter Brothers and Melitte Buchman, Chairs
- Moving Image Related Materials and Documentation: Mary Huelsbeck, Chair
- News, Documentary & Television: Sadie Roosa and Michael Muraszko, Chairs
- Nitrile: Rachel Parker and Heather Heckman, Chairs
- Open Source: Kara Van Malssen, Jack Brighton and David Rice, Chairs
- Preservation: Taylor Whitney and Sue Bigelow, Chair
- Projection and Technical Presentation: Brittan Dunham and Doug McLaren, Chairs
- Regional Audiovisual Archives: Madeline Moya and Siobhan Hagan, Chairs
- Small Gauge and Amateur Film: Taylor McBride and Dino Everett, Chairs

TASK FORCES
Task Forces are ad hoc committees of the board, typically with a one year charge
- Film Advocacy: Elena Rossi-Snook, Chair
- Online Continuing Education: Linda Tadic and Lance Watsky, Chairs

AMIA PUBLICATIONS
- The Moving Image: Don Crafton and Susan Ohmer, Editors
- AMIA Newsletter: Liza Palmer, Managing Editor
- David Lemieux, Editor

Join us for the Opening Keynote and Conference Welcome on Thursday morning where we will present the AMIA 2014 Silver Light Award and recognize the recipients of the Scholars Program, Hauer Fund and Travel Grants.

2014 Scholarships and Internship Recipients
- Image Permanence Institute Internship: Lauren Alberque
- Sony Pictures Scholarship: Felizarda Kutsakatika
- The Rick Chace Foundation Scholarship: Erin Palombi
- Universal Studios Scholarship: Jonathan Farbowitz

Carolyn Hauer Fund
- Judith Opoku-Boateng, University of Ghana
- Paula Félix-Díder, Museo del Cine, Buenos Aires
The Carolyn Hauer International Fund is a fund dedicated to promoting internationalism within the Association of Moving Image Archivists.

San Francisco Silent Film Festival Conference Travel Grant
Funded by the San Francisco Silent Film Festival, the travel grant offers travel funding for the Annual Conference. The inaugural recipient is:
- Alina Sinetos

AMIA Community Fund
Funded by member contributions, the Community Fund provides travel funding for the Annual Conference. The 2014 recipients are:
- Jeff McCarty
- Sibel Melik
- Juana Suarez
Each year, AMIA awards recognize outstanding professional achievement in and contributions to the field of moving image archiving.

**AMIA Silver Light Award**
**Robert J. Heiber**
To recognize his outstanding career achievement in moving image preservation, the 2014 Silver Light Award is presented to Robert Heiber

**William S. O’Farrell Volunteer Award**
**Rick Utley**
To recognize his significant contributions to AMIA and the field, the William S. O’Farrell Volunteer Award is presented to Rick Utley.

**AMIA Spotlight**
**Pam Wintle**
Awarded by the Board of Directors, the AMIA Spotlight recognizes members who have made significant contributions.

*Read more about the 2014 Award recipients after the Conference in the AMIA Winter Newsletter.*
L’Immagine Ritrovata
state-of-the-art film restoration laboratory
at the highest forefront of technological innovation

- Facility based in Bologna, Italy, that includes all workflows, from 4K to photochemical
- Winner of the 2013 Focal International Award as Preservation Film Laboratory of the Year
- Organiser of the Film Restoration School Asia (Singapore, 18-23 November 2013) and the FIAF Film Restoration Summer School (Bologna, 28 June - 18 July 2013)

AMIA Registration Desk

Conference packets and additional conference information will be available at the Registration Desk during these hours:

- **Tuesday - Thursday**: Second Floor, 7:30am - 6:00pm
- **Friday**: Second Floor, 7:30am - 6:00pm
- **Saturday**: Lower Level, 7:30am - 3:00pm

AMIA Vendor Cafe

Please join us for the always informative AMIA Vendor Exhibits in the Cafe. Plus, raffle prizes at each morning and afternoon break.

- **Thursday**: Vendor Hours, 9:15am - 6:30pm
- **Friday**: Vendor Hours, 9:10am - 2:00pm

Poster Sessions

Up-to-date research emphasizing the issues and concerns encountered within the moving image archive profession will be presented in Poster Sessions on Thursday and Friday 12:00pm - 2:00pm in the Vendor Cafe. Each day will feature new Poster presentations.

Morning Plenary

Each morning will kick off with a plenary session. A continental breakfast is served each morning at the start of the session, but please note the breakfast serving times in the program.

Please wear your badge!

AMIA registration badges will allow you access to all sessions, the Opening Cocktail Reception, the Vendor Cafe, Archival Screening Night, and the Closing Cocktail Reception. You must wear your badge for entry. For events with tickets, please note you will need your ticket and your badge for entry.

Special Programming

The Conference Keynote and Morning Plenaries
The Thursday morning Keynote and the daily plenaries will feature speakers that provide big picture perspectives, innovative insights, and broad outlooks on current issues of interest to the entire audience. Plenary sessions will bring together all conference delegates at the first session of every morning.

AMIA 2014 Keynote Speaker - Ian MacKaye
Following the Welcome and presentations, AMIA welcomes Keynote speaker Ian MacKaye. MacKaye is currently the front man of The Evens and formerly of the influential D.C. punk bands Minor Threat and Fugazi. He is the founder of the Dischord Records music label and the mastermind behind the Fugazi Live Series project, which is in the process of digitizing and publishing over 800 Fugazi shows performed and recorded internationally dating back to 1987.

Friday Plenary The NEH and Audiovisual Preservation and Access
Saturday Plenary AMIA/DLF Hack Day: Results and Solutions

Conference Streams
Each day will feature a curated stream of programming, offering three different themes through the week. Each stream will run a full day, with the sessions keyed so they are easily identifiable.

Thursday: OSDPAS - The Open Source Digital Preservation and Access Stream
Software has become an integral component of digital preservation and access. Motivated by preservation principles as well as budgetary considerations, open source software has been embraced by the archival community. Curated along with AMIA’s Open Source Committee this stream will cover what the AMIA community needs know, ranging from fundamentals to highlighting some of the most innovative and relevant projects today.

Friday: FiT - Film in Transition
As the portfolio of available film stocks continues to decline and film labs continue to close worldwide, this stream will discuss the concrete implications this evolution of the industry has for archives and long-term content managers.

Saturday: GE - Global Exchange
Will bring together voices from regions around the world to share solutions and exchange ideas. Curated by AMIA’s International Outreach Committee, the emphasis will be on exchange, innovation, and learning from colleagues near and far. In addition to Saturday’s sessions, the Global Exchange stream will screen two films on Saturday evening.
HD - 2K - 4K

Archival Scanning & Digital Restoration

Utilizing the Scanity High Dynamic Range Scanner

The Red Shoes

Before Restoration

After Restoration

Our team utilizes the latest tools to scan and restore your motion picture film and still images, including the DFT Scanity with High Dynamic Range technology. We can handle 16mm & 35mm motion picture film along with a wide range of still image formats.

We can also partner with you on digital restoration for those projects that need special attention. Our team’s years of experience allow us to handle complicated jobs, in both the realms of film and data.

Contact us to see how we can assist you in digitizing your collections and making them more accessible. Preferred AMIA Membership discounts apply.

Visit our website at www.prasadcorp.com

Conference Program | Tuesday

8:00am - 5:30pm | Scarborough 2 | Pre-registration required
Workshop: Small Gauge Projection and the Art of Projector Maintenance and Repair

Chairs
Taylor McBride, Smithsonian Institution
Dino Everett, USC SCA Hugh M. Hefner Moving Image Archive

Speakers
Skip Elsheimer, A/V Geeks
Ben Moskowitz, New York University
Siobhan C. Hagan, University of Baltimore Langsdale Library
Liz Coffey, Harvard Film Archive

The Small Gauge Amateur Film Committee hosts a full-day pre-conference workshop on small gauge film projection and projector maintenance and repair. The workshop will cover 16mm, 8mm, and Super 8 film projection and projector repair and maintenance protocol for 16mm, 8mm, and Super 8 projectors (at least one model of each), as well as how to repair VHS players and tapes. Attendees will have the chance to work hands-on with the playback machinery and will leave with the knowledge of how to safely project small-gauge archival film as well as how to care for the projectors needed to view them. This workshop is made possible through the generous sponsorship of Boston Light & Sound and A/V Geeks LLC.

8:30am - 5:30pm | Scarborough 1 | Pre-registration required
Workshop: AMIA Cataloging and Metadata Committee Workshop [Day I]

Chairs
Thelma Ross, Academy Film Archive
Randal Luckow, HBO

Speakers
Andrea Leigh, Library of Congress - Packard Campus
Rebecca Guenther, Library of Congress/NYU MIAP Program
Linda Tadic, Audiovisual Archive Network
Meredith Reese, HBO
Meghan Fitzgerald, HBO

The bi-annually held cataloging and metadata workshop is sponsored by the AMIA Cataloging and Metadata Committee. This modified 2014 version contains new content and offers attendees—past and future alike—a workshop that emphasizes practical implementation of a variety of tools, including tools currently in development. It incorporates more hands-on exercises than ever before and addresses how the attendee can concretely integrate new models for description into their current workflows and environments. The two-day program moves the attendee from concept to implementation starting with cataloging principles and metadata concepts that form the basis for describing and providing access to moving images in an evolving media and media technology environment. The workshop includes information about the role of cataloging for analog and digital asset management; the value, purpose and application of metadata and cataloging standards; management of resources through their life cycles; descriptive, structural, and administrative metadata (including rights and preservation metadata); and, data models and data mapping. Dynamic presentations encompass film, video, digital, and broadcast materials and include interactive exercises to put cataloging and metadata concepts directly into practice.
4K Scanity - Optimized for Archival (16mm, 35mm, Nitrate + Audio)
2.3K ScanStation - Gentle 8mm, Super 8mm, 9.5mm + Audio
4K Restoration - Color Grading, DRS, Sound, LTO-5 & 4K Film Out
Library Solutions - Digital Vaulting, SmartSearch Metadata, Web & iPad Review, Storefronting & Monetization
**Workshop: Audiovisual & Preservation Technology Basics for Non-Engineers**

Speaker: James Snyder, Library of Congress

The workshop will focus on providing a good technical basis, in plain English, for those who do not already have audiovisual engineering training. The goal is to allow non-technical people of all types to have a good, basic grasp of the technologies, concepts and terms involved in audiovisual recording and reproduction in general, digitization of audiovisual materials, and what is involved in file-based workflows, metadata and long-term data archiving once materials are digitized. People who attend the workshop will walk away with a good, operating grasp of the technologies involved, de-mystifying the terms and concepts audiovisual archivists face every day at institutions large and small to know what materials they are looking at, how to handle their preservation, how to plan for their digital conversion, and have a functional knowledge of the terminology and concepts required to write grants and contracts for digital conversion and storage of audiovisual materials.

**Workshop: AMIA Cataloging and Metadata Committee Workshop [Day II]**

Chairs: Thelma Ross, Academy Film Archive
Randal Luckow, HBO

Speakers: Andrea Leigh, Library of Congress - Packard Campus
Rebecca Guenther, Library of Congress/NYU MIAP Program
Linda Tadic, Audiovisual Archive Network
Meredith Reese, HBO
Meghan Fitzgerald, HBO

The bi-annually held cataloging and metadata workshop is sponsored by the AMIA Cataloging and Metadata Committee. This modified 2014 version contains new content and offers attendees—past and future alike—a workshop that emphasizes practical implementation of a variety of tools, including tools currently in development. It incorporates more hands-on exercises than ever before and addresses how the attendee can concretely integrate new models for description into their current workflows and environments. The two-day program moves the attendee from concept to implementation starting with cataloging principles and metadata concepts that form the basis for describing and providing access to moving images in an evolving media and media technology environment. The workshop includes information about the role of cataloging for analog and digital asset management;
the value, purpose and application of metadata and cataloging standards; management of resources through their life cycles; descriptive, structural, and administrative metadata (including rights and preservation metadata); and, data models and data mapping. Dynamic presentations encompass film, video, digital, and broadcast materials and include interactive exercises to put cataloging and metadata concepts directly into practice.

8:30am – 5:30pm | Scarbrough 3 | Pre-registration required
AMIA/DLF Hack Day
Chairs  
Kara Van Malssen, AVPreserve
Steven Villereal, University of Virginia
Lauren Sorensen, Library of Congress

AMIA/DLF Hack Day is a unique opportunity for practitioners and managers of audiovisual collections to join with developers and engineers for an intense day of collaboration to develop solutions for audiovisual preservation and access. Within digital preservation and curation communities, hack days provide an opportunity for archivists, collection managers, technologists, and others to work together to develop software solutions, documentation or training materials, and more for digital collections management needs. We are also hosting a concurrent Wikipedia edit-a-thon, which will focus on topics related to digital preservation & access for audiovisual materials. While we encourage non-engineers to participate in the hack day portion, there’s a lot of work to be done to describe topics relevant to our community on Wikipedia as well.

10:00am - 5:00pm | Off Property | Pre-registration required
Workshop: Community Archiving
Chair  
Amy Sloper, Wisconsin Center for Film and Theater Research Archives
Moriah Ulinskas, Bay Area Video Coalition

Speakers  
Sandra Yates, McGovern Historical Center | The TMC Library
Yvonne Ng, WITNESS
Mona Jimenez, Moving Image Archiving & Preservation, NYU
Rachel Beattie, Media Commons - Robarts Library, University of Toronto

Community Archiving provides moving image archivists the opportunity to serve the community of Savannah and work with local volunteers to help an organization gain intellectual and physical control over an endangered moving image collection. This year we are partnering with All Walks of Life (AWOL), a non-profit organization that provides arts and technology education for at-risk youth in Savannah. Conference attendees will be paired with teens who have been working with AWOL for the past few years as well as archivists from the Savannah community to conduct basic processing, cataloging and inspection of a collection of videos produced by AWOL.

12:30pm - 5:30pm | Lucas Theatre | Pre-registration required
The Reel Thing XXXIV
Chairs  
Grover Crisp, Sony Pictures
Michael Friend, Sony Pictures

Presenting the latest technologies in audiovisual restoration and preservation. The Reel Thing brings together a unique line up of laboratory technicians, archivists, new media technologists and preservationists. Curated by Grover Crisp and Michael Friend.
Workshop: Preserving Your Audio and Video Assets: The Essentials

Chair: Peter Brothers, SPECS BROS., LLC
Speaker: John Walko, Scene Savers

What do you need to know to protect the video and audio materials in your collection? If you want to preserve these valuable assets, you really need a basic understanding of the media...what is unique about it, how it should be handled, how to evaluate its condition, and what concepts and decisions need to be applied to preserve the content for future generations. This workshop will start with an overview of tape structure, proper handling/storage procedures, obsolescence considerations and evaluation techniques needed to assess and protect what you have in your collections. This will include pictorial guides to identifying tape types, rate danger from obsolescence and standardized procedures to evaluate if tapes are safe to play or copy. The workshop will then review popular digital file options, digital storage options, essentials for choosing and dealing with digitization or storage vendors, how to determine when digitization or storage can be done in-house and, finally, options for metadata and content retrieval.

Newcomer’s Mixer

Welcome to the AMIA Conference! The Newcomer program pairs first-time attendees with experienced AMIA members. Support and guidance is offered to those who may be attending an AMIA conference for the first time and provides experienced AMIA members an opportunity to meet newcomers to the field or to the conference.

Opening Cocktails: Welcome to Savannah!

It’s opening night in Savannah! A chance to say hello to friends, meet new colleagues, and get ready for the days ahead.

AMIA Trivia Throwdown

Trivia Master: Colleen Simpson, Prasad Corporation

Test your skills, win prizes and see if you can be the team that unseats the current AMIA Trivia Champions. Put your name on that monkey trophy! Everyone is welcome - sign up as a team or as an individual table.
Bifrost enables archives to create and restore high quality digital media through the streamlining and automation of many once-specialised tasks and processes. It is a unique solution using a highly cost effective and efficient workflow.

With our unique Universal Optics you can scan film from 8mm up to 70mm and every format in between without changing the optics.

Award winning automated and manual tools for video and film restoration.
8:00am - 8:30am | Regency Ballroom | Breakfast available 7:30am-8:00am
AMIA Conference Welcome
2014 Silver Light Award and Scholars Presentation

Please join us for a continental breakfast and the official Conference welcome and to recognize the 2014 Silver Light Award honoree as well as this year’s scholarship and internship recipients.

8:30am - 9:15am | Regency Ballroom
AMIA 2014 Keynote Speaker: Ian MacKaye

Ian MacKaye is currently the front man of The Evens and formerly of the influential D.C. punk bands Minor Threat and Fugazi. He is the founder of the Dischord Records music label and the mastermind behind the Fugazi Live Series project, which is in the process of digitizing and publishing over 800 Fugazi shows performed and recorded internationally dating back to 1987. MacKaye has been a featured speaker at several preservation and archive conferences, highlighting his work on the Fugazi Live Series and offering a unique perspective and appreciation on archival practice and managing collections. Questions and engagement are highly encouraged.

9:15am – 6:30pm | Regency Ballroom
AMIA Vendor Café

Don’t miss an opportunity to visit the vendor exhibits! The vendor exhibits are a great way to learn what is new, what is working and what is on the horizon. Whether or not you are a buyer, the Café is an opportunity to meet colleagues who provide the products and services we all rely on.

9:30am - 10:30am | Scarborough 1
OSDPA: Open Source Tools, Technologies and Considerations

Speakers
Trevor Thornton, North Carolina State University
Lauren Sorensen, Library of Congress

Software has become an integral component of digital preservation practice. Based on preservation principles as well as budgetary considerations, open source software has been embraced by the archival community. However, there is still a lack of clarity regarding the process and component parts that make up open source software projects. Trevor Thornton will present an introduction to
FUJIFILM RECORDING FILM for Digital Separation ETERNA-RDS 35mm Type 4791(PET) is the world's first archive film designed especially for laser film recording. The award was given to FUJIFILM Corporation* for the design and development of ETERNA-RDS for use in the archival preservation of film and digital images.

*2012 Scientific and Engineering Award presented to FUJIFILM Corporation, Hideyuki Shirai, Katsuhisa Uozeki and Hiroshi Hirano

© 2013 FUJIFILM North America Corporation and its affiliates. All rights reserved.
open source development, with particular focus on developing web applications. He’ll discuss some fundamental open source concepts, provide an overview of technologies utilized in web application development, and offer important considerations for implementers at all levels. Lauren Sorensen will speak about Git and Github, providing an overview of its usefulness to developers, archives and other communities. She will focus on examining uses for Github and version control in an AV archives context, walk through Git and Github signup, review a script to demonstrate Github’s utilities, and relate these topics back to Thornton’s talk.

9:30am - 10:30am | Scarborough 2
Return to the Fold: Reuniting Filmmaker Manuscripts with Their Films

Chairs  Nancy Kauffman, George Eastman House
        Jared Case, George Eastman House
Speakers  Ken Fox, George Eastman House
          Stacey Doyle, George Eastman House

How do film archives handle manuscript collections? In 2013 George Eastman House received a grant from a previously untapped funding source – the Council on Libraries and Information Resources – to answer just this question. The Moving Image Department launched a pilot project designed to process the manuscripts of four unique independent filmmakers and fully incorporate the resulting finding aids into the museum’s larger cataloging system. The aim is a more holistic approach to collection management and representation of materials in multiple formats, which will improve discoverability and thereby better serve the researcher. This session will address the importance of manuscripts in a film archive and the challenges faced when integrating archival description into a museum cataloging system. The panelists will also talk about the four filmmakers, the content of their collections, and the processing procedures they employed.

11:00am - 12:00pm | Scarborough 3
Hidden Cinema: Moving Image and Sound from Medical Research Institutions

Chair  Angela Saward, Wellcome Library/Wellcome Trust (UK)
Speaker  Timothy Wisniewski, Alan Mason Chesney Medical Archives/John Hopkins Medical Institutions (US)

In the Wellcome Library, the earliest material is a wax cylinder recording of Florence Nightingale’s voice (1890) and the collection’s particular strength is in twentieth century medical humanities (aka history of medicine). The Alan Mason Chesney Medical Archives is the official repository of the Johns Hopkins Medical Institutions, and maintains an extensive collection of medical audiovisual materials produced by this institution, with a particular strength in films of pioneering mid-century developments in cardiac surgery and cardiology. The presentation will endeavor to show what it means to be a department ‘nested’ within a bigger organization which has specific challenge areas, looking at collection development strategically and addressing ‘communicating the archive’ - marketing the resource internally, and experiences of leveraging funding. Some of the complexities in handling the legal aspects of material featuring people in the health system (especially patients) will be shared. Some material from the collections will be screened as part of the session.

11:00am - 12:00pm | Scarborough 1
OSDPA: One Body, Many Heads: Preservation and Access From Project Hydra

Speakers  Karen Cariani, WGBH
          Jon Dunn, Indiana University Library
          Stefan Elnabli, Northwestern University Library
          Hannah Frost, Stanford University Libraries

Open source solutions to our challenges in audiovisual preservation and access not only include tools and software applications, but technological frameworks that constitute a foundation for innovation. One such framework is Project Hydra - an exciting collaboration of archivists, media-managers, and software developers who are building and using this community-sourced application framework to create new and open systems that manage, preserve, and provide access to digital audiovisual content. This panel will showcase Hydra-influenced open source projects and strategic planning from WGBH, Indiana University Library, Northwestern University Library, and Stanford University Library. From unique audiovisual preservation systems to cataloguing and access management solutions, rep-
resentatives will discuss their projects, how their work meets the growing demands of audiovisual preservation and access, and their experiences in developing for the open source community.

11:00am - 12:00pm | Scarborough 2
**How Safe is Your Data - Examining Data Loss in an Archival Environment**

*Chair* John Walko, Scene Savers  
*Speaker* Barry Lunt, PhD, Brigham Young University

After you have digitized content from your collection, how do you know it is safe? As archivists, we’re taught to have three copies on three different type of media. But why does the media fail in the first place? Join us to gain an understanding of how data is stored, read back, and how data errors are detected and corrected. We’ll report on what causes drive failures and what you can do to ensure your data is safe.

12:00pm - 2:00pm | Vendor Café

**Poster Session: Thursday Presentations**

- **Party Out of Bounds: Fundraising and Outreach in Special Collections**  
  Mary Miller, Walter J. Brown Media Archives
- **From Videola® to BlackMagicPro: Digitization Solutions at Underfunded Archives**  
  Jorge Avila, Fundación Patrimonio Filmico Colombiano  
  Juana Suárez (Translator), NYU
- **How to be an Archival Rock Star**  
  Hannah Palin, University of Washington Libraries, Special Collections
- **Avalon Media System**  
  Stefan Elnabli, Northwestern University Library
- **Research on Energy Saving Opportunities in Libraries and Archives**  
  Christopher Cameron, Image Permanence Institute
- **The Race to Save the History of Hollywood Park**  
  Staci Hogsett, UCLA Moving Image Archive Studies  
  Alina Sinetos, UCLA Moving Image Archive Studies
- **The Lost Works of Fred Engelberg at The USC Hugh M. Hefner Moving Image Archive**  
  Malin Kan, UCLA MIAS
- **Out of Experimental Television: Audiovisual Preservation at Cornell**  
  Tre Berney, Cornell University
- **A Century of Sound: The Sound of Movies 1933-1975**  
  Robert Heiber, The Rick Chace Foundation

12:00pm - 1:00pm | Sloane
**Meeting: Open Source Committee**

12:00pm - 1:00pm | Percival
**Meeting: Conference Committee**

12:00pm - 1:00pm | Verelist
**Meeting: Small Gauge/Amateur Film Committee**

1:00pm - 2:00pm | Sloane
**Meeting: Publications Committee**

1:00pm - 2:00pm | Percival
**Meeting: Moving Image Related Materials & Documentation (MiRMD) Committee**

Speakers
Ben Fino-Radin, The Museum of Modern Art
Kara Van Malssen, AVPreserve
Dan Gillean, Artefactual Systems

For three years, the Museum of Modern Art has worked to build the first digital repository designed to meet the needs and requirements of museum collections. This new system aims to facilitate digital collections care, management, and preservation for time-based media and born-digital artworks. Long-term viability and sustainability have been at the core of the design from the outset, extending to every aspect of the project - from the interdepartmental and interdisciplinary team of advisors at MoMA that steered the project, to the fundamental involvement of outside field experts, and the decision to leverage and adapt existing, open-source software. This presentation will offer a public demonstration of this new repository system, a discussion of the development process, and insights into decisions made during its design and implementation. Emphasis will be placed on the practical aspects of project management and the process of building such a system upon open-source frameworks.

Preserving Eyes on the Prize

Chair Nadia Ghasedi, Washington University
Speakers Irene Taylor, Washington University
Laura Major, Colorlab

Regarded as the definitive work on the Civil Rights Movement, the documentary series, Eyes on the Prize, has been seen by millions since its PBS debut in 1987. However, what remains unseen are the 75 hours of interview outtakes that provide further insight into the series’ original stories of struggle, resistance, and perseverance. Learn more about Washington University Film & Media Archive’s efforts to preserve and make accessible this invaluable primary source content for scholars, teachers, students, and filmmakers alike through its Eyes on the Prize Preservation Project. Now in its fourth and final year, this Andrew W. Mellon Foundation-funded project is preserving the first six hours of the series and all associated interview outtakes. This session will explore approaches to managing large-scale preservation projects, including the use of ancillary collection materials to inform the planning process, technical challenges, workflow management, metadata creation, lab communication, and future digitization and reassembly.

Play It Again: Creating a Playable History of Australasian Digital Games

Speaker Nick Richardson, Australian Centre for the Moving Image

The ‘Play It Again’ project is a collaboration between cultural and academic institutions to preserve the largely unknown histories of 1980s game development in Australia and New Zealand, ensuring that local titles are documented, collected, preserved and once again playable to the public. The project aims to reflect the emergence of a profession from a hobby, the strengths and differences of the local scene and demonstrate its importance to international discussions of gaming. This presentation outlines the successes of the project and also the challenges for one cultural institution embarking on a new field of collection and preservation.
KODAK GRATEFULLY ACKNOWLEDGES THE SUPPORT OF FILMMAKERS WHO DEMAND THE BEST.

We are proud to supply the film that makes your images and stories incredible. For uncompromising performance, choose KODAK Motion Picture Film.

Kodak.com/go/motion
3:30pm - 4:30pm | Scarborough 2
State of the States: Evaluating US Regional AV
Chair: Siobhan Hagan, University of Baltimore
Speakers: Anne Wells, Chicago Film Archives
Lynette Stoudt, Georgia Historical Society

Many archives throughout the United States hold unique audiovisual materials within their collections. The content of these records typically document the region in which they originated and include materials such as local television, industrial films, oral histories, or home movies. Just as each geographic area in the country has different weather patterns, industry, and demographics, each region must rely on itself to preserve the majority of its moving image and recorded sound legacy. This panel will discuss where each state or region falls on the preservation spectrum, the factors that contribute to the region’s preservation environment, and how things may change for the better in order to avoid a catastrophic loss of recorded American culture. The findings presented will be gathered from a recent survey conducted by the Regional Audiovisual Archives Committee (RAVA) to identify the under-served regions of the nation and to gain assistance from the more successful models.

3:30pm - 4:00pm | Scarborough 1
OSDPA: Video Accessibility on the Web and Open Standards
Speaker: Jason Ronallo, North Carolina State University

Video on the Web presents new challenges and opportunities. How do you make your video more accessible to those with various disabilities and needs? This session will focus on writing captions, subtitles, descriptions, and timed metadata tracks for Web video using the WebVTT W3C standard. Encoding timed tracks in this way opens up opportunities for new functionality on your websites beyond accessibility. The presentation will show some examples of the potential for using these standards in creative ways.

3:30pm - 4:00pm | Scarborough 3
Case Study: Audio Separation and Re-purposing and Restoration of Assets
Chair: Derek Luff, XTracks
Speakers: Vince Tennant, XTracks
Lars Bjerre, XTracks

This Case Study will focus on the separation of music, dialog or vocals from composite mix elements. The technology provides options on how to restore, repurpose and monetize existing television, film and various multi media content that does not have available split track elements. Before and after examples will include: removal of a vocal track from a stereo orchestral film composite mix enabling a new enhanced score to be added, music removal/replacement in a foreign language television program, music removal/replacement in a domestic television show retaining the original sound effects and dialog so that new cost effective music with proper licensing can be inserted and the title distributed, and dialog removal from film for theme park applications.

4:00pm - 4:30pm | Scarborough 1
OSDPA: QC Tools: Official Launch
Speakers: Dave Rice, QCTools
Ashley Blewer, QCTools

Quality Control Tools for Video Preservation (QC Tools) is an initiative to develop a suite of open source software tools, which can identify artifacts and errors prevalent in digitized analog video collections. The goal is simple: to cut down the time it takes to perform high-quality video preservation and direct time towards preservation issues that are solvable. A two year NEH-funded research and design project, QC Tools builds upon an existing error database, now aggregated and available to the public in the Audio/Visual Artifact Atlas (AVAA). For this presentation members of the QC Tools team will present the final tool, walking the audience through the process of analysis of digitized video files. Presentation topics to be covered include: The QCTools User Interface, Overview of Analysis and Playback Filters, QCTools Building Blocks, and User Guide Help/Documentation.

4:00pm - 4:30pm  |  Scarborough 3
BitTorrent and the Rise of Private Digital Repositories
Speakers  
Mark Simon Haydn, McGill University
Justin Mckinney, McGill University

This session considers contemporary trends in digital access to moving image collections, with a particular focus on private digital repositories. Addressing issues around copyright, orphan films, and members-only online communities, the session will highlight the decisions facing guardians of moving image collections. Including case studies and examples of the approaches taken by individual archives, we aim to stimulate discussion around steps that might be taken by private digital repositories. Attendees are encouraged to share experiences of accessing and making accessible moving image heritage.

4:45pm - 5:15pm  |  Scarborough 3
Collaborative Linked Data Tool for Moving Images
Chair  
André Kilchenmann, Digital Humanities Lab, University Basel
Speaker  
Dr. Lukas Rosenthaler, Digital Humanities Lab, University Basel

Research on moving images usually presents difficulties because the dynamic medium is not so easy to grasp. Existing software solutions facilitate the task, but are often limited to the medium of film. At our institute, we are developing a virtual research environment called SALSAH (System for annotation and linkage of sources in the arts and humanities). The question we posed was, when we have the digitized data, what will we do with it? The answer: We will not just archive it, we will use it. SALSAH is a fully web-based platform that provides a private environment for researchers, and a restricted environment for public access. It provides tools for searching, annotating, marking regions on images, and linking diverse media objects. We are now also creating a new module for working with audio and video files.

4:45pm - 5:45pm  |  Scarborough 2
2-inch Treasures: Preserving and Appreciating Vintage Video in Cinema-Centric Cultures
Chairs  
Mark Quigley, UCLA Film & Television Archive
Jeff Martin, Independent Media Arts Preservation
Speakers  
Margie Compton, Walter J. Brown Media Archives & Peabody Awards Collection
Dan Einstein, UCLA Film & Television Archive
David Crosthwait, DC Video

While many film preservation projects at major archives and studios enjoy public screenings in repertory cinemas and notice in the press, the preservation of vintage analog video by archives often goes unheralded, due in part to the complicated public performance rights issues associated with television and the fact that the artistic merits of the medium are generally devalued outside of select academic and professional circles. Despite the low-profile of these on-going video projects, the content being unearthed and preserved at archives such as Peabody and UCLA illustrates the immense cultural and historic value embedded within the perceived unglamorous realm of 2” inch videoreels. A panel of archivists and experts will discuss the technical challenges of working with this material and present important recent finds from the cathode vaults.

4:45pm - 5:45pm  |  Scarborough 1
OSDPA: Lightning Talks
Topics and speakers TBD at conference via sign-up sheet
LAC Group, the Leader in Information Curation and Knowledge Management, is pleased to congratulate Rick Utley, recipient of AMIA’s 2014 Bill O’Farrell Award.

Rick’s dedication to AMIA follows only to his dedication to his faith, his family and the people of LAC/PRO-TEK. Like the award’s namesake, Rick is a true mentor and visionary in our field. We are honored to have Rick as part of the LAC team and are confident that his legacy of contribution will endure for years to come.

Congratulations to Rick and to all the 2014 AMIA Awards recipients from your friends at LAC Group.
5:15pm - 5:45pm | Scarborough 3
Cynthia Maughan: Portapak Ophelia in a Clawfoot Tub
Speaker: Jonathan Furmanski, Getty Research Institute

This session is an examination of the Cynthia Maughan Archive at the Getty Research Institute. Maughan (b. 1949) created hundreds of videoworks during the 1970s that were notable for their ad hoc theatricality, deadpan morbid sense of humor, and intensely solitary relationship with the camera. The artist stopped making videos in 1981 and her works sat unwatched for decades on their original spools of ½ inch videotape. After extensive conservation and reformating, the work is now poised to be reintroduced into a cannon of video art that has largely forgotten it. The speaker will discuss the challenges of stabilizing and transferring such a collection, and also include screenings of works that have not had an audience in over three decades. This session will be of interest to anyone wishing to learn about practical aspects of obsolete media restoration, twig funerals, file based video storage, dance prosthetics and novelty coconut bank comedians.

5:45pm - 6:30pm | Vendor Café
Cocktails in the Vendor Café

Let the Vendors in the Cafe buy you a drink! In your registration envelope is a drink ticket for tonight’s cocktails.

7:45pm - 10:00pm | Lucas Theatre
AMIA 2014 Awards & Archival Screening Night

Please join us to honor our 2014 AMIA Award honorees. Then, following the Awards, is the 24th annual Archival Screening Night.
8:30am – 9:15am | Vendor Café | Breakfast Served 8:15am – 8:45am

**Morning Plenary | The NEH and Audiovisual Preservation and Access**

**Speaker**  Joshua Sternfeld, National Endowment for the Humanities (NEH)

Senior Program Officer Joshua Sternfeld will discuss the National Endowment for the Humanities’ heightened special interest in audiovisual preservation. He will trace the Division of Preservation and Access’s support for digital reformatting, research and development, and education and training. His talk will conclude with a preview of the afternoon open forum to discuss the current and future needs of the field of A/V preservation.

9:15am – 2:00pm | Vendor Café | Regency Ballroom

**AMIA Vendor Café**

Don’t miss an opportunity to visit the vendor exhibits! The vendor exhibits are a great way to learn what is new, what is working and what is on the horizon. Whether or not you are a buyer, the Café is an opportunity to meet colleagues who provide the products and services we all rely on.

9:30am - 10:30am | Scarborough 1

**FIT: Film, Feet and the Photochemical: The Next Three Years**

**Chair**  Katie Trainor, The Museum of Modern Art

**Speakers**  Andrew Oren, Fotokem

Janice Allen, Cinema Arts, Inc

Reto Kromer, AV Conservation and Restoration Scientist

Motion Picture labs are shutting with regularity; the equipment is being purchased by some existing labs with the intentions on continuing photochemical preservation. There are several archives still very dedicated to this way of preservation. This panel asks and aims to answer the following questions: Realistically, what are the number of films that an archive can commit to restoring for the next three years? Is there enough business to keep the few labs going?
ABC’s of Video QC: Essential Steps in the Digitization Workflow

Chair: Kimberly Tarr, New York University Libraries, Bobst Library
Speakers: Kristín MacDonough, Bay Area Video Coalition
Kristín Lipska, California Audiovisual Preservation Project

An increasing number of cultural heritage institutions are embarking on projects to preserve their analog video holdings yet lack the infrastructure and resources to conduct quality control (QC) on the resulting digital files. As a result, digital files with video and/or audio issues, or improperly named files, are accepted as preservation masters. We’ll demystify QC by explaining what resources are necessary to ensure that the files received are the deliverables requested. One presenter will highlight process and workflow; another will discuss the benefits of referencing the A/V Artifact Atlas, which offers visual examples of the technical issues and anomalies that can afflict audio and video signals. We’ll also share a new publication that assists organizations initiate, define, and manage video digitization projects with vendors. At the conclusion of this 60-minute session, attendees will have been introduced to resources and tools to help them develop their own QC practice.

Surveillance and Security in the Archive: Managing Sensitive Multimedia Collections

Chair: Nicole Martin, Human Rights Watch
Speakers: Molly Fair, Independent Archivist
Rachel Mattson, Independent Archivist
Snowden Becker, UCLA Moving Image Archive Studies

In an increasingly technologically dependent world where access to information is just a click away, we are more reliant than ever on digital tools and infrastructure that are easily surveilled, produce seemingly limitless records and data, and require security precautions to maintain basic privacy. Using four case studies, this discussion-format panel will provide examples of archivist’s relationships to surveillance footage within their collections and methods used to secure data and physical assets. Archivist Molly Fair discusses the ethics of archiving surveillance footage of student and union demonstrations. Nicole Martin of Human Rights Watch presents a guide to using open source encryption software to secure collection assets. Snowden Becker from UCLA’s Moving Image Archive Studies talks about evidence managers and their collections, and Rachel Mattson, former professor and iWitness Video collective member, speaks about digital forensics and her work archiving surveillance footage of police activities.

Capturing a Shadow: Digital Forensics Applications with Born-Digital Legacy Material

Chair: Julia Kim, National Digital Stewardship Resident / New York University Libraries
Speakers: Elizabeth Roke, Emory University
Peter Chan, Stanford University

“Digital forensics” is a buzz phrase repeated often in the archival communities today, but what does it mean? How will it apply to the backlog of born digital materials? Through a brief overview of digital forensics frameworks and applications in archival workflows, as well as several case studies, audience members will understand how better to approach complex materials on hard drives, floppies, and optical media. They will come away with an understanding of some of the key steps in a digital forensics workflow, such as write blocking, disk imaging, and intellectual arrangement. By drawing on several contemporary case studies recently made available to researchers, audience members will be better equipped to approach complex works on these carrier mediums, traditionally relegated to the margins of our discipline, which go beyond moving images to include databases, emails, and even software programs.

Pursuing PBCore: The Revitalization of a Schema and Community

Chairs: Casey E. Davis, WGBH Educational Foundation
Dave MacCarn, WGBH Educational Foundation
Speakers
Jessica Bitely, Northeast Document Conservation Center
Jack Brighton, Illinois Public Media
John Passmore, WNYC
Mary Miller, Peabody Awards Collection Archivist

“PBCore is intended specifically for public broadcasters.” “Since we are not primarily an AV archive, PBCore is not relevant to our needs.” “PBCore is a little too intense for what we can handle.” “EAD is more appropriate for our AV collection.” Responses such as these flooded in after the PBCore Advisory Subcommittee launched its user and non-user survey this April. Conceived a decade ago, PBCore provides a simple and concise schema for organizing descriptive and technical metadata and sharing media items among and within organizations that deal with audiovisual materials. So why hasn’t PBCore been more widely adopted? Why are many media and archival organizations still unaware that PBCore exists? Why does it intimidate potential users? The panel will explore these questions and ask the audience for feedback on the most crucial question of them all: “What can we do to better serve the needs of PBCore’s intended community?” The work of AMIA’s PBCore Advisory Subcommittee will be discussed.

11:00am - 12:00pm | Scarborough 1
FIT: The Sustainability of Film Heritage within the Digital Economy
Speakers Luca Antoniazzi, University of Leeds
Asen O. Ivanov, University of Toronto

The technological and economic shift of the film industry is creating both opportunities and challenges for the film archiving sector, bringing about new issues to be discussed. Among them sustainability has emerged as an important topic in the context of the digital preservation of media collections. However, the majority of the publications dealing with this topic rarely make reference to film heritage and film cultures. Rather, they tend to focus on economic, organizational, and infrastructural factors. As a result, much current research has neglected crucial cultural issues pertaining to the sustainability of film collections. This panel will focus on the sustainability of both born-analogue and born-digital collections in the current economic, technological and cultural context. It will enrich the debate around that topic by bridging information science and cultural heritage studies perspectives. The main objective of the panel is to initiate a debate that could lead to a more complex and thoughtful definition of sustainability as a guiding principle of collections management.

12:00pm - 2:00pm | Vendor Café
Poster Session: Friday Presentations
Doris Chase and the WCFTR: Creating A Culture of Collaboration at UW-Madison
Willie Thurlow, Wisconsin Center for Film and Theater Reasearch/UW-Madison

Ho’okele: Navigating the Moving Image History of the Hokule’a
Robert Omura, The Henry Ku’ualoha Giugni Moving Image Archive of Hawai’i

Bridging the Gap: Social Media and Traditional Outreach Strategies
Amy Ciesielski, Moving Image Research Collections

Grassroots Digitization for Living Archives
Rebecca Fraimow, Dance Heritage Coalition

One Reel at a Time: Facing the Reality of AV Collections
Cynthia Ghering, Michigan State University Archives
Portia Vescio, Michigan State University Archives

Database Solutions For Archival Institutions In Ghana
George Gyesaw, Institute of African Studies

Nitrate Committee Presentation: Stages of Nitrate Deterioration - Does Cool and Dry Really Matter?  
Speakers Rosa Gaiarsa, UCLA Film & Television Archive  
Jeffrey Bickel, UCLA Film & Television Archive

This open meeting of the AMIA Nitrate Committee offers a discussion on the stages of nitrate deterioration. The presentation will feature examples of stages of nitrate deterioration from two different processes: the slow aging process of the film itself, and the more aggressive reaction to extraneous materials, like film cement, tape adhesive and other film stock. The second part will show the effects of temperature and humidity controlled storage on the survival of salvaged nitrate film, after deterioration has been removed. Open to all attendees.

1:00pm - 2:00pm | Sloane  
Meeting: Magnetic Tape Crisis (MC2) Committee

1:00pm - 2:00pm | Percival  
Meeting: International Outreach Committee

Meeting: Education Committee

2:00pm - 3:00pm | Scarborough 2  
Sailing the Ship: Supporting and Managing Change at Large Institutions  
Chair Erica Titkemeyer, UNC-CH  
Speakers Crystal Sanchez, Smithsonian Institution  
Rebecca Fraimow, WGBH

For many large cultural organizations there is a significant gap between the institutional importance of audiovisual materials and the ability for large institutional systems to effectively support their reformatting, research, and delivery. New systems, technologies and procedures for handling audiovisual materials offer the opportunity for significant improvement in managing this complex content, but the bigger the institution the more complicated it becomes to implement necessary change. This proposed panel will focus on the challenges of introducing large-scale audiovisual preservation initiatives into existing systems, including case studies from UNC’s Southern Folklife Collection, the Smithsonian Institution, and WGBH. Panelists will present recommendations, lessons learned, and effective solutions employed in their own projects, with an eye toward global changes to collections-management with a variety of institutions.
2:00pm - 3:00pm | Scarborough 1
FIT: What to do With All Those Stinky Films: Practical Guidelines for the Identifying, Managing and Freezing Films in Advanced Stages of Vinegar Syndrome
Chair Rachael Stoeltje, Indiana University Libraries Moving Image Archive
Speakers Jean-Louis Bigourdan, Image Permanence Institute
Andy Uhrich, Indiana University Libraries Moving Image Archive

The panel combines scientific information on cold storage with the results of a real-world implementation of freezing films in advanced stages of acetate deterioration. The speakers will provide practical advice for collection managers dealing with "stinky" films worth saving. The Image Permanence Institute's Jean-Louis Bigourdan will present on the science of vinegar syndrome and IPI's tools for identifying and managing acetate acid deterioration in acetate film prints. The second part of the panel will be focused on a real life case of freezing a large quantity of deteriorated films at the Indiana University Libraries Moving Image Archive. Rachael Stoeltje will discuss the unintended creation of an acidic gas bomb that seriously corroded the $32,000 freezer. Andy Uhrich will follow up with how to properly freeze this material using step-by-step guidelines created by the National Parks Service.

2:00pm – 3:00pm | Scarborough 3
An Update on AS-07: MXF Application Specification for Archiving and Preservation of Video
Speakers Chris Lacinak, AVPreserve
George Blood, George Blood Audio Video Film
James Snyder, Library of Congress

AS-07 is an MXF wrapper specification for the preservation and long-term archiving of audio-visual content. The effort to create the specification has been led by the Federal Agencies Digitization Guidelines Initiative (FADGI), and since 2013 has taken place under the auspices of the Advanced Media Workflow Association (AMWA). This effort has benefitted from the input and vetting of an international group of users, service providers and manufacturers. The result is a specification that has a high-level of correlation with Standards from SMPTE, ISO/IEC and EBU and thoroughly addresses the needs of archiving and preservation. The session will begin with an overview of wrappers to ensure a basic understanding of the topic before delving into a status update on AS-07 and its salient features. This will be followed by a detailed discussion on some of the more challenging elements addressed within AS-07, which make it particularly useful for archiving and preservation purposes.

3:30pm - 4:30pm | Scarborough 1
FIT: The Virtual Life of Film Preservation
Chair Erik Pihl, Anthology Film Archives
Speakers Skip Elsheimer, A/V Geeks
Dave Rice, CUNY TV

Traditional practices in the preservation of motion picture film have progressed on long-evolving, finely-skilled techniques derived from optics, conservation, and chemistry. Alternatively the digitization of film now offers the moving image archivist a new set of techniques and refigured preservation objectives. This panel attempts to offer new approaches and analysis of the narrowing gaps of objectives and results when photochemical preservation procedures meet the new virtual reality. The session will explore options of film preservation planning and deconstruct digital formats and workflows currently common in film scanning, analyze the gaps of significant characteristics between a film print and its digital facsimile, and cover and compare use cases in film preservation underway this year.

3:30pm - 4:30pm | Scarborough 2
NEH Open Forum: Tackling the Big Challenges in Audiovisual Preservation
Speaker Joshua Sternfeld, National Endowment for the Humanities (NEH)

Following the morning plenary session, NEH Senior Program Officer Joshua Sternfeld will lead an open forum to discuss the pressing needs in the field. Preservation experts argue that we have a shrinking window of about 15 years to preserve the vast majority of our media collections on legacy analog and digital formats. Given the enormity of the task at hand, what strategies are
available to mobilize the community? Where are the noticeable gaps in knowledge, resources, and infrastructure that may require additional research and development, educational opportunities, and collaboration? How might preservationists need to refine their daily workflows in areas such as assessment, appraisal, stabilization, and sustainability? What new ways might archives, libraries, and museums engage with users such as researchers, students, and the general public? Where might we find points of intersection between public and private interests? Participants are encouraged to come ready with ideas and questions for a lively, fast-paced discussion!

3:30pm - 4:30pm | Scarborough 3
We Do FFmpeg and You Can Too
Chair Morgan Oscar Morel, George Blood Audio Video Film
Speakers George Blood, George Blood Audio Video Film
Madison Stubblefield, Media Preserve
John Walko, Scene Savers

FFmpeg is a free and powerful open source tool that has a number of uses in A/V media preservation. It may look scary at first, but with the proper resources you CAN use it. Speakers at this panel come from various A/V preservation vendors. Each speaker will discuss how they use FFmpeg to enhance their digital workflows, from creating web accessible and DVD ready files, to dealing JPEG 2000 video files. This panel will also provide information about what to expect from legal and technical perspectives if you wish to implement FFmpeg at your own institution.

4:45pm - 5:45pm | Scarborough 2
Out of the Closets & Onto the Web: Digital Access & LGBT Archives
Chairs Alice Royer, Outfest
Mark Quigley, UCLA Film & Television Archive
Speakers Todd Wiener, UCLA Film & Television Archive
Daniello Cacace, ACT UP Oral History Project
Karen Sundheim, James C. Hormel LGBT Center, San Francisco Public Library

A growing number of institutions are collecting LGBT moving images—a critical component of queer life—and launching initiatives to ensure that the LGBT community’s previously hidden history is available for research and reflection. In the context of the current broader national conversation regarding LGBT marriage equality, gender identity politics, and human rights, now is the time to consider how those important collections might continue to play a role in building understanding within and across communities, and ask how they might be made accessible to larger audiences through the use of digital tools and related online access projects. This panel will focus on the significance of, and possible strategies for providing digital access to archival collections of LGBT moving images while also considering sensitive issues of privacy and access related to such materials, including home movies and erotica. Topics to be discussed include: funding, digital asset management, curation, user-end functionality, privacy, and ethics, all as they relate to the specific needs and goals of LGBT moving image collections.

4:45pm - 5:45pm | Scarborough 3
Digitizing Motion Picture Films: What are we Doing, and Why?
Chair Greg Wilsbacher, USC Moving Image Research Collections
Speakers Jim Lindner, Media Matters LLC
Ken Weissman, Library of Congress

In the transition from the physical to the digital it is vital for us to ask what we are doing and why we are doing it. Why is this so important now? Motion Picture film is expensive to access as a physical media. Digitizing film carries with it handling costs that will make repeating this procedure difficult to justify. Thus, we should consider what we want to accomplish in the long term (measured in decades and centuries) when we handle, process and scan films. Currently, this conversation has been dominated by questions of format, codec, and asset management. But these aren’t the only questions we should be considering if we wish to preserve the history of motion picture film culture for future generations.
4:45pm - 5:45pm  | Scarborough 1
Fit: Obsolete Film Formats in the Digital Age: 3mm, The Smallest Gauge

Chairs  
Jeff Martin, Archival Moving Image Consultant  
Dino Everett, USC SCA Hugh M. Hefner Moving Image Archive

Speakers  
Marsha Gordon, North Carolina State University  
Reto Komer, Reto.ch

Following up on the very successful Fatally Flawed Film Format sessions of the past, this edition will focus on the smallest known film gauge ever used: 3mm. Panelists will discuss the history of 3mm, including its inventor, Eric Berndt; creating homemade 3mm acetate film stock; and the process of shooting and developing the 3mm film. A screening of the 3mm film will follow. This is an opportunity to discuss not only this format but the larger issues of saving obsolete formats in the digital age, and how archivists can be activists by continuing to exhibit fatally flawed technology like 3mm.

5:45pm - 6:45pm  | Sloane
Meeting: Cataloging & Metadata Committee

5:45pm - 6:45pm  | Percival
Meeting: Independent Media Committee

5:45pm - 6:45pm  | Verelist
Meeting: Diversity Committee
7:15pm - 8:00pm | Scarborough 1
It Happened in 16mm: A Night of Regional Film

Chairs  
Taylor McBride, Smithsonian Institution
Siobhan C. Hagan, University of Baltimore Langsdale Library

Speakers  
Amy Ciesielski, University of South Carolina
Kelly Haydon, New York University
Erica Titkemeyer, Smithsonian Institution Archives
Laurel Gildersleeve, University of Wisconsin-Madison SLIS

The Small Gauge Amateur Film Committee and the Regional Audiovisual Archives Committee are co-sponsoring a small gauge screening event that will feature 16mm film from regional archives across the country. The program will be curated from the collections of AMIA members, with a focus on RAVA's committee members.

8:05pm - 8:50pm | Scarborough 1
Girls on Film: Juliette Gordon Low and the Girl Scouts

Chairs  
Melissa Dollman, Crawford Media Services
Devin Orgeron, North Carolina State University

Speakers  
Katherine Keena, Juliette Low Birthplace
Melanie DeKerlegand, Vance-Granville Community College
Oddball Films/San Francisco Media Archive

Savannah is the birthplace of both Girl Scouts and the organization’s founder Juliette Gordon Low. Join us for the panel discussion and screening, “Girls on Film: Juliette Gordon Low and the Girl Scouts,” during which we offer an inside glimpse at sponsored films for and media works made by Girl Scouts. Also present will be Katharine Keena, a representative of the Juliette Gordon Low Birthplace.

8:55pm - 9:40pm | Scarborough 1
Unsilent Savannah

Chairs  
Timothy Wisniewski, Alan Mason Chesney Medical Archives, Johns Hopkins University
Stephen Parr, Oddball Films/San Francisco Media Archive

Speakers  
Lynette Stoudt, Georgia Historical Society

This screening event combines rarely seen silent archival films culled from the collections of Savannah area archives, cultural institutions and private collections with live performances of new scores composed by local electronic and experimental musicians. The program will feature the Center for Low County Studies’ films of archaeological sites throughout coastal Georgia, Georgia Historical Society’s Home Movies of Johnny Harris (1940-1941), highlighting scenes of the popular Savannah barbeque restaurateur’s domestic life with his wife, their monkey, dog, and chickens as well as a variety of eclectic home movies and amateur films from private collections documenting life in Savannah. Musicians performing new scores at the screening include Jeff Zagers, who has toured extensively and has an impressive discography of releases on various record labels, and other active participants in the local avant garde music community, including Michael Christopher Walker, Gus Miller, and Ross Fish.
MTI Film takes the next step forward in digital film restoration with DRS™NOVA.

AMIA Annual Business and Membership Meeting and Continental Breakfast

Members and guests are welcome and encouraged to attend the Membership Meeting to hear the annual “State of the Association” report, updates about current projects, and offer special recognition to AMIA members who have gone “above and beyond” in their service to all of us. The open forum will provide an opportunity to raise questions not addressed elsewhere in the conference. And at the end of the meeting, the 2014/15 Board of Directors will take office as we thank departing Board members for their great service to the Association.

Morning Plenary | AMIA/DLF Hack Day: Results and Solutions

Chairs: Kara Van Malssen, AVPreserve
        Steven Villereal, University of Virginia
        Lauren Sorensen, Library of Congress
        Hack Day Participants

Earlier in the week practitioners and managers of digital audiovisual collections joined with developers and engineers for an intense day of collaboration to develop and refine simple tools for digital audiovisual preservation and access. In this morning’s plenary, we’ll review their work and hear the results of some of these collaborations.

GE: Online, On the Road, and Inside the Classroom: Advocacy Campaigns in Southeast Asia and the Pacific

Chair and Irene Lim, National Archives of Singapore / SEAPAVAA
Speakers  Sanchai Chotirosserananee, Film Archive Thailand
         Karen Chan, Asian Film Archive
         Mick Newnham, National Film and Sound Archive of Australia

Given that the audiovisual archiving movement is relatively young in Southeast Asia and the Pacific, advocacy is an integral part of the strategies and operations of institutions in the region to garner support, educate stakeholders, and promote their work. This session will examine some ingenious and engaging advocacy initiatives in the region including the Film Archive Thailand’s Film Rescue Van, the Asian Film Archive’s various educational programs, and the National Film and Sound Archive of Australia’s outreach services.
Saturday  |   Conference Program

9:45am - 10:45am | Scarborough 1
Using Films: Reviving 16mm in the 21st Century Classroom
Chairs: Elena Rossi-Snook, The New York Public Library
       Jennifer L. Jenkins, University of Arizona
       Johanna Bauman, Pratt Institute
Speakers: Carolyn Faber, School of the Art Institute of Chicago
          Antonella Bonfanti, Canyon Cinema
          Jacob Barreras, University of Colorado, Boulder
          Dwight Cody, The Boston Connection
          Josephine McRobbie, Indiana University (alumna)
          Asia Harman, Indiana University (alumna)

The goal of this panel is to bring together successful users of 16mm in educational contexts, and to demonstrate ways in which collections managers and film faculty can revive this format in 21st century classrooms. This session will engage the tension between conservation for longevity and archiving for access to original formats right now. It will also: raise awareness of the inherent value of the original format, argue for access to that format, propose the new model for success which partners librarians and educators with archivists. Audience members will be encouraged to contribute to a culminating discussion of the status, successes and obstacles in keeping film in the learning environment.

9:45am - 10:45am | Scarborough 3
Scholarly & Archival Activism: The Case of Felicia (1965)
Chair: Dr. Jacqueline Stewart, University of Chicago
Speakers: Skip Elsheimer, A/V Geeks
Dr. Marsha Gordon, North Carolina State University
Dr. Allyson Nadia Field, University of California, Los Angeles

This presentation focuses on Felicia (1965), a short documentary that tells the story of an African American high school student living in the Watts neighborhood of South Los Angeles, California, with her mother and two siblings. Made by three white film students while they were attending UCLA, Felicia is an exceptional document of life in Watts prior to the rebellions that took place in the summer of 1965. Skip Elsheimer will discuss how Felicia ended up in his collection and evaluate its status as part of a much larger collection of educational film materials, followed by a screening of his 16mm print of the film. Dr. Marsha Gordon will discuss how she came to work with the film and what her research—including finding and interviewing the three filmmakers and the documentary’s titular subject, Felicia, almost fifty years after the film was made—has revealed about the film. Dr. Allyson Nadia Field will discuss the scholarly, exhibition, and preservation work being done presently to ensure that this film does not disappear again.

11:00am - 12:00pm | Scarborough 3
American Archive of Public Broadcasting: A Community of Public Media Builds an Archive
Chair: Karen Cariani, WGBH Educational Foundation
Speakers: Lauren Sorensen, Library of Congress
Allison Smith, formerly of Wisconsin Public Radio
Nadia Ghasedi, Washington University Libraries
Casey Davis, WGBH Educational Foundation

On paper, the American Archive of Public Broadcasting is a collaboration between WGBH and the Library of Congress. In practice, it is a collaboration among public media institutions and collections nationwide. WGBH and LOC enable preservation and access by working to organize and sustain collections through the American Archive project that is active and engaged with the community at large. This panel will discuss future plans and vision for the collection’s growth and dissemination, progress on the ground regarding access, preservation and the collaborative model, as well as input from contributing stations and archives.
11:00am - 12:00pm | Scarborough 1
Teaching Film: Maintaining Small Gauge Film Education and Production

**Chair**  
Taylor McBride, Smithsonian Institution

**Speakers**  
Dino Everett, USC; Echo Park Film Center
Andrew Busti, University of Colorado at Boulder/Analogue Industries Ltd.
Peggy Ahwesh, Film & Electronic Arts Program, Bard College

Filmmakers and teachers discuss the current state and future of small gauge as an educational and film production medium. Panelists Peggy Ahwesh, Andrew Busti, and Dino Everett will use their experience as artists and film production instructors to re-enforce the importance of maintaining small gauge production as a medium for creativity and education as professional modes of production shift increasingly to digital. This will include discussing the inherent value of small gauge formats and its potential for wide-spread impact as a mode of expression, particularly for youth populations. Framed within the context of film archives, the panel will consider how the work of grassroots organizations to maintain small gauge education and production might inform the work of film archivists tasked with preserving and maintaining appropriate access to these materials. The panel will include projection of films created at Bard College, Process Reversal, and Echo Park Film Center.

11:00am - 12:00pm | Scarborough 2
GE: Thinking Solutions for Latin American Archives

**Speakers**  
Juana Suárez, Proimágenes Colombia
Julio Cabrio, Universidad de la República
Paula Félix-Didier, Museo del Cine de Buenos Aires
Julieta Keldjian, Archivo Audiovisual Universidad Católica del Uruguay

As with most archives in the world, Latin American archives face the challenge of conserving and preserving a backlog of analog materials; at the same time, they are under pressure to transition to mass storage technologies, digitization, and orient their work to access. But audiovisual heritage has only been acknowledged as an important cultural element very recently in the region, which, in many cases, has not been translated yet into the funding policies that are required to achieve long-term preservation. This panel will discuss issues related to current practices and projects in amateur cinema, digitization, digital preservation, and film restoration in Latin America, providing a perspective of the state of the art in the region as well as presenting very innovative projects that have come to be with limited resources but a lot of wit, creativity, and enthusiasm.

12:00pm - 1:00pm | Sloane
Meeting: Online Continuing Education Task Force

12:00pm - 1:00pm | Percival
Meeting: Lesbian, Gay, Bisexual & Transgender Committee

12:00pm - 1:00pm | Verelist
Meeting: Projection & Presentation Committee

1:00pm - 2:00pm | Sloane
Meeting: Access Committee

1:00pm - 2:00pm | Percival
Meeting: Regional Audio-Visual Archives (RAVA) Committee

1:00pm - 2:00pm | Verelist
Meeting: News, Documentary & Television Committee
### 2:00pm - 3:00pm | Scarborough 2
**GE: International Film Production, Preservation, and Discovery: Two Stories**

**Chair and Speaker**
Richard Fauss, West Virginia State Archives  
Karan Bali, Filmmaker  
Tina Anckarman, National Library of Norway  
Xinyu Dong, Center for East Asian Studies, University of Chicago

This panel will feature two tales of international discovery, cooperation, and film heritage. The first presentation brings together Indian filmmaker Karan Bali and the West Virginia State Archives to talk about the creation of Bali's 2013 film, An American in Madras. The film tells the story and accomplishments of American Ellis Dungan and his influence on Indian Cinema in the Tamil Region from 1935 to 1950. The second presentation tells the story of how at the National Film Archive of Norway, seven reels of Pan Si Dong, an important Shanghai production, regarded as lost by Chinese archivists, was found in the late Fall of 2011. The discovery shocked the archival world and made headline news on China's biggest TV channels.

### 2:00pm - 3:00pm | Scarborough 3
**One Size Doesn’t Fit All: Three Contrasting Methods for Digitizing Moving Image Collections**

**Chair** Rachael Stoeltje, Indiana University Libraries Moving Image Archive  
**Speakers**  
Gregory Lukow, Library of Congress  
Dino Everett, USC's Hugh Hefner Moving Image Archive

Moving image archivists are still developing common digitization standards and every archive is customizing their digitization procedures and practices to fit local needs and budgets. This panel brings together three models that serve similar goals of providing access to collections but have different solutions to the challenge. Dino Everett will present on a one-person operation that relies on providing password protected individual access for researchers by digitizing the film in house and loading the files into Vimeo for user access. Rachael Stoeltje will present on the various digitization strategies at IU including: user requested, password protected access through AVALON, previous digitization projects currently available to the public and the larger digitization projects being considered for preservation purposes. Gregory Lukow will present on a variety of digitization on demand services for video and deteriorated film as well as their digitization for preservation purposes program.

### 2:00pm - 2:30pm | Scarborough 1
**Unearthing the African-American Community Through Home Movies**

**Speaker** Jasmyn R. Castro, NYU Moving Image Archiving & Preservation

The portrayal of African-Americans in film has been much debated since the advent of the moving image. One of which being that African-Americans must be owners of media in order to be well represented in the media. There is no better demonstration of this than what is depicted in the home movies shot by African-Americans during the heyday of the 8mm and Super 8mm formats. In the Summer of 2014, Jasmyn R. Castro, set out to discover what was available in terms of the self-depicted African-American community. This presentation will focus on the African-American home movie collections available to researchers, scholars & enthusiasts, highlight and screen a small selection of what was discovered, and speak to the importance of everyday depictions of minority communities.

### 2:30pm – 3:00pm | Scarborough 1
**Tracking Media Fragment Provenance & Derivatives With A Graph Database**

**Speaker** Laurence Cook, metaCirque

Would you like the power to quickly trace provenance of any clip within a derivative or edit master file at the touch of a button? Or, in reverse, trace all access derivatives from an original source? Would you like to learn how your existing metadata resources and workflows can be leveraged to harness the power of social networking software, enabling you to quickly discover relationships between essence fragments within and/or across media libraries? A data model that opens doors to more intuitive visualizations? Attendees will be introduced to the metaCirque graph database model, which provides an open source solution for tracking media fragment provenance, derivatives,
content ownership and access rights. The model is extensible, and extremely scalable. It is also schema and unique identifier regime agnostic, placing identification emphasis upon a media fragment’s context, rather than requiring adoption of a universal naming convention for data integration. Come, explore the future!

3:00pm | Lucas Theatre
AMIA Community Screening: Disney’s Peter Pan (1953)

A Conference tradition, this year’s restoration screening is a public event for the Savannah community. Conference attendees welcome.

3:30pm - 4:30pm | Scarborough 3
Click Capture, Press Play: Digitization Initiatives for Regional AV Collections

Chairs
Rebecca Fraimow, Dance Heritage Coalition
Julia Kim, National Digital Stewardship Resident/New York University Libraries

Speakers
Hannah Palin, University of Washington Libraries, Special Collections
Pamela Jean Vadakan, California Audiovisual Preservation Project

Archivists have been warning of the dangers to obsolete audiovisual materials for decades - and people are listening. Although most content holders are aware of the need for preservation, the lack of funding and resources for digitization present obstacles. In order to meet this need, new initiatives are developing partnerships with audiovisual preservation experts and online archives to provide access to at-risk audiovisual materials and make preservation available to all. This session will provide information about three initiatives—California Audiovisual Preservation Project, Moving Image Preservation of Puget Sound, and New York’s XFR Collective. Each organization is at a different stage in the process and will focus on the current status of their initiative. We will examine questions of sustainability, creative options for funding, and other challenges, and also discuss how other archivists can form collaborations to continue the process of helping organizations and individuals preserve and make their materials accessible.

3:30pm - 4:30pm | Scarborough 1
De-accession, Delete or Destroy: Removing Items from Collections

Chair
Deborah Stoiber, George Eastman House

Speakers
Jennifer Jenkins, University of Arizona
Steve Wilson, Harry Ransom Center

De-accessioning is practiced to refine, enhance and strengthen an institution's collections. Materials can be removed for a variety of reasons, but there are key factors that can make de-accessioning difficult. For an archivist, analyzing collections for possible removal can be daunting when curators, collection staff, administration and the public are reluctant to dispose of any materials and may not always understand the implications as well as the benefits of the de-accessioning process. In this session archivists from a wide range of archives and libraries will discuss their core values of how, why and when materials are removed, allowing attendees to get a comparative look at de-accessioning across a variety of institutions, including materials held by, state universities, private museums and foreign archives. Case studies from represented archives will be presented.

3:30pm - 4:30pm | Scarborough 2
GE: Stop the Presses: Repatriating American Film Heritage Abroad

Chair and
Gregory Lukow, Library of Congress

Speakers
Giovanni Fossati, EYE Film Institute Nederland
Louise McCrone, New Zealand Film Archive
Ray Edmondson, Archives Associates
Jeff Lambert, National Film Preservation Foundation

In March of 2014, the National Film Preservation Foundation and the EYE Film Institute made a public announcement regarding a partnership to repatriate and preserve American films found in the Netherlands, majority of which don’t exist or are only extant in inferior prints on US soil. The EYE approached NFPF after learning about the much publicized repatriation project between the latter and the New Zealand Film Archives in 2010. A similar project, though quite forgotten, was
the repatriation of American films from Australia between the National Film and Sound Archives and a number of different US archives during the early 90s. This panel aims to discuss how such big repatriation projects between two countries are managed and more importantly shed light on what happens long after the press releases quiet down.

4:45pm - 5:15pm | Scarborough 1
Finding the Silver Lining: Considering Cloud Storage, A How-To
Speaker Seth Anderson, AVPreserve
Planning and decision making for any archives and preservation project is fraught with consideration and re-consideration of every detail. When evaluating cloud storage providers, it is dangerous to assume services are uncomplicated; that requirements for storage are obvious, and therefore inherently met by the service provider. There is no all-in-one solution that will fulfill every archive's needs for storage of audiovisual collections. No two services are the same and the variance between services often represents the difference between successful implementation and a failed initiative. The difficulty lies in knowing where to begin and what questions to ask. Offering a place to start, this presentation will examine emerging use cases for cloud storage in audiovisual archives and propose nine valuable topics to consider when vetting storage services.

4:45pm - 5:45pm | Scarborough 3
Bing Crosby's Dictaphone - Recovering the Lost Voice
Chair Allan Falk, Post Haste Digital
Speakers Jim Allan, Post Haste Digital
Eric Dosch, Post Haste Digital
Robert Bader, The Bing Crosby Archive
In 1945, Bing Crosby acquired a piece of cutting-edge technology -- the iPhone of his day. It was a Dictabelt, and he was using it two years before it was publicly available. With it, he recorded his thoughts, his ideas, his letters, and more. For over twenty years, he spent hours every day recording letters and more, generating thousands of recordings. Now, 70 years later, Post Haste Digital has unearthed machines, salvaged parts, and made repairs to rebuild an functioning Dictabelt, making these lost recordings available for the first time. This 60 minute session will be co-presented by Post Haste Digital and Robert Bader of The Bing Crosby Archive. We will outline the process and the technical challenges overcome in rebuilding this machine and restoring the materials. Mr. Bader will present an overview of the archive, and will feature never-before-released recordings - letters, interviews, and more -- that have only recently been recovered.

5:15pm - 5:45pm | Scarborough 1
Digital Preservation for Technophobes on a Budget
Speaker Susan Barrett, Arizona State University
Designed for participants who are unfamiliar with digital preservation, this session will present cost-effective strategies for digital asset management. Learn about digital formats, storage options and access models that can meet the needs of archives with limited budgets or technical expertise. You will begin development of a digital asset management plan using strategies that are flexible and responsive to the needs of your unique institution. Learn digital preservation best-practices, including metadata management and cataloging. Based on the Digital Moving Image Archives (DMIA) guide, participants will gain necessary knowledge to feel more competent and confident about digital asset management, managing digital accessions, and delivering educational outreach programs.
The hallmarks of any successful training or cooperative initiative share several common components: aligned goals and expectations, elimination of assumptions through understanding of local contexts, a focus on exchange over one-directional presentation, and sustainability by follow through. AMIA members have been involved in several global and regional training initiatives over the past few years that work to embrace these approaches, including NYU’s Audiovisual Preservation Exchange (APEX), ICCROM’s Safeguarding Sound and Image Collections (SOIMA), and FIAF’s School on Wheels. This session will present on the impact that these unique programs have through their training and networking approaches, both successes and shortcomings. Representatives from each initiative will present on the respective program’s philosophy and model and will discuss the outcomes, lessons learned, and identified areas of improvement. In the spirit of exchange, the final presentation will be from the unique perspective of an individual who has participated in all three of these initiatives, and who will present on her experience in both successful and unsuccessful cooperative initiatives.

5:45pm - 6:45pm | Harborside
Closing Cocktails
Join us as we say goodbye to colleagues and friends and mark the closing of the 2014 conference. Take memento home with you - our friends at Iron Mountain are setting up a photo booth!

7:00pm – 9:30pm | Scarborough 2
Global Exchange Screenings: An American in Madras and Pan Si Dong
Screenings will feature the two films discussed during the session, “International Film Production, Preservation, and Discovery: Two Stories,” part of this year’s Global Exchange Stream. There will be a brief Q&A following the screening of each film.

An American in Madras (dir. Karan Bali, 2013, 79 min) primarily traces American-born filmmaker Ellis R. Dungan’s years in India. Dungan made India his home from 1935-50 and became a celebrated director in the Tamil Film Industry based in South India. Born in 1909 and hailing from Barton, Ohio, Dungan reached India on February 25th, 1935 intending to stay for 6 months, but ended up staying for 15 years and making 13 feature films, 11 in Tamil and one each in Telugu and Hindi. During this period, he brought many technical innovations to the developing Tamil Film Industry of the 1930s and ‘40s, and infused a sense of professionalism into its filmmaking. All this, without understanding a word of the language! The film traces Dungan’s Indian connection right up to 1994, when on a trip to India, the Tamil Film Industry felicitated him in Madras for his contribution to its development, 43 years after he had left India.

In Pan Si Dong (aka The Cave of the Silken Web, dir. Dan Duyu, 1927, 60 min.) the pilgrim Tang Hiuen Tsangs, sent out to search for the holy books, is caught and kept prisoner by seven beautiful women who turn out to be spirits of the Spider Cave. They try to force him to marry their leader, meanwhile his followers struggle to rescue him. Finally, after many failures, they succeed using advice from the White Goddess, and they set off from the cave. Pan Si Dong is full of magic and spirits with extraordinary powers. The moral is obvious: live wisely, don’t follow your desires, and if you conduct an ungodly life it will destroy you. Pan Si Dong was regarded as lost until 2011 when a copy was found in the vaults of the Norwegian National Library. The news about the find made headlines all over China. With its many beloved characters and popular actors Pan Si Dong set a new box office record in China in 1927. It is regarded as one of the most important films in the history of Chinese cinema.

www.jvc-media.com
JVC Advanced Media is providing long term archiving and migration solutions for optical discs. Our error checker is for initial and periodical testing. Our special archival grade burner and the world's first ISO/IEC10995 certified DVD-R provides the longest migration intervals available in the market.

Lasergraphics, Inc.
20 Ada
Irvine, CA 92618
p. 949.753.8282  |  f. 949.727.9282
email: info@lasergraphics.com
www.lasergraphics.com
Since 1981, Lasergraphics has been at the forefront of film scanning and recording technology. We continue to invest heavily in innovative scanner technology R&D to meet the increasing demands of the archival and restoration markets. Lasergraphics designs and manufactures a complete line of film scanners. The Director scans at up to 4K for archival scanning and restoration. Its Triple-flash High Dynamic Range (HDR) offers the best capture of film shadow detail of any film scanner on the market. The ScanStation now offers a 5K scanning option and can scan at up to 60 fps -- making it the highest resolution and fastest film scanner available today. Unlike traditional telecines and real-time scanners, the ScanStation can be used by minimally-trained operators. Both scanners feature simultaneous image and sound capture, and directly generate popular file formats such as ProRes, TIFF, and DPX.

Digital archiving from 35mm, 16mm and 8mm film, all contemporary 5D/HD and legacy video formats including 2’ Quad, audio archiving, browser enabled digital asset management solutions, media recovery.
Give your archived assets a new lease on life with Preferred Media’s digitization services.

Apart from your library physically aging with each passing year, the opportunity for you to repurpose the content is becoming less, as the equipment needed to view and edit your material becomes scarcer. Maybe it is time that you thought about digitizing your valuable content, before format obsolescence ultimately impacts.

Preferred Media, your trusted partner in film, media archive and management for over 30 years can now provide complete media conversion to a variety of digital formats, providing you with the opportunity to renew, re-use and repurpose your depreciating content.

Your valuable assets can be revived and made to work for you in many different formats, with all your new digital content being backed-up and retained in the ideal conditions to ensure preservation and made available for you when you need them.

Photo Credits

Special thanks to Margie Compton, UGA Libraries Media Archives & Peabody Awards Collection Special Collections, for our cover image as well as images throughout the Program.

Page 4. Ty Cobb “The Georgia Peach,” Detroit, and Joe Jackson, Cleveland, standing alongside each other, each holding bats. 1913. Library of Congress Prints and Photographs Division.

Page 9. The Shu/gale Enterprise rolls out of the manufacturing facilities with Star Trek television cast members (1976). NASA Photo. DeForest Kelley was born in Atlanta, Georgia. He said “This man’s dead, Captain” the first time to Gregory Peck in The Man in the Gray Flannel Suit in 1956.

Page 10. Chief Executive returns from Warm Springs, Georgia. Looking the picture of health, President Roosevelt today returned from a Spring vacation at Warm Springs. Harris & Ewing Collection. Library of Congress.

Page 17. Lawton Family Home Movie Collection, Walter J. Brown Media Archives & Peabody Awards Collection, University of Georgia Libraries.

Page 23. Negro treasury deputies on War Bond staff. Negro deputies in the Treasury Department, appointed to work among farmers and rural families selling war bonds, in Washington for a special intensive training course on October 22 and 23, 1942. Office of War Information. Library of Congress.

Page 25. Mrs. Rebecca L. Felton, 11/18/22. National Photo Company Collection. Library of Congress. Rebecca Felton was the most prominent woman in Georgia during the Progressive Era and the first woman to serve in the US Senate.

Page 29. The D. Earl Comb Christmas parade (Atlanta, GA 1930s).
Photo Credits

Page 41. President Lyndon B. Johnson signs the 1964 Civil Rights Act as Martin Luther King, Jr., others look on. LBJ Library photo by Cecil Stoughton. LBJ Library. King was born in Atlanta, Georgia in 1929.

Page 51. Lawton Family Home Movie Collection, Walter J. Brown Media Archives & Peabody Awards Collection, University of Georgia Libraries.

Page 70. Drink Coca-Cola 5 cents. Popular Graphic Arts Collection. Library of Congress. Originally intended as a patent medicine when Coca-Cola was invented in the late 19th century by John Pemberton.

Page 73. Grand banner of the radical democracy, for 1864. Campaign banner for presidential nominee John C. Fremont and his running mate John Cochrane. Fremont was a Georgia native (he and Cochrane didn’t win). Published by Currier & Ives, c1864. Library of Congress.

Page 75. Officers and crew of the German submarine U.58, captured by the U.S.S. Fanning, entering the War Prison Camp at Fort McPherson, Georgia. Mathewson & Winn. War Department. National Archives at College Park. In 1934 Ft. McPherson was used as a detention center to hold picketers who had been arrested while striking at a cotton mill in

Page 76. President Jimmy Carter, Egyptian President Anwar Sadat, and Israeli Prime Minister Menachem Begin reviewing Marines during Camp David Accords. September 6, 1978. Trikosko, Marion S., photographer. Library of Congress. Due to the agreement, Sadat and Begin received the shared 1978 Nobel Peace Prize. Carter won the Nobel Peace Prize in 2002 and remains the only president from the state of Georgia.

Back Cover. Bird Girl is a sculpture made in 1936 by Sylvia Shaw Judson in Lake Forest, Illinois. It achieved fame when it was featured on the cover of the 1994 novel Midnight in the Garden of Good and Evil.
It takes a lot of people working year round to ensure a successful conference. It’s an incredibly dedicated group of volunteers who work together bringing you five days of sessions and screenings and workshops and everything that goes with it.

First, thank you to our sponsors and donors, without whom the Conference would not be possible ....

To the Conference Committee who has worked for a year to bring the Conference together and to make your experience in Savannah the best it can be ...

To the volunteer curators of this year’s conference streams, who developed excellent sessions of focused programming ...

To the speakers and workshop leaders who develop programming that not only address today’s issues, but look to the future of our field....

To our committees who will begin discussing next year’s program at this year’s meetings ...

To the volunteer staff who give up their vacation time to spend a week at AMIA making sure everything goes smoothly ...

And especially to all of you who have come to Savannah to attend AMIA 2014 ...

On behalf of all of us at AMIA -
Thank you!
Committed to preserving the past for the future.

Deluxe brings together the best talent and technology in the industry to support all aspects of the content lifecycle. Now, we are bringing together the distinguished service you trust from Chase Audio, Cinetech and Archive Solutions, to help filmmakers, archivists and content owners preserve and restore the world’s most important sound, still and moving images...all under one roof.

Deluxe, your name in content preservation.

Deluxe is a proud sponsor and longtime supporter of AMIA.
